General Position Summary & Purpose:

We are year two into the setup of our Australian Leonardo business, after merging a few smaller Leonardo owned companies in January 2020. We are open to hearing from talent who are agile, resilient, energetic and excited about change and transformation to assist our new LA Team with building a great business in Australia. You will be based in our Port Melbourne Office and will work 3 days/22.8 hours per week across the following tasks:

Key Responsibilities / Task Areas of Position:

- Routine maintenance of our System Integration & Test Facility (SI&TF), including conducting weekly, monthly and quarterly preventative maintenance tasks on the equipment in the SI&TF in accordance with the required maintenance schedules;
- Conducting equipment and cable fault finding and problem solving on the New Generation Communications and Management System (NewGen MCS);
- Test and repair of specific communications equipment in accordance with approved procedures;
- Carrying out the installation and removal of equipment for testing purposes based on approved Work Orders;
- Installing, removing or modifying cables within the SI&TF based on approved Work Orders;
- Assisting with the conduct of Acceptance Testing by running of approved Test Procedures to verify functionality;
- Assisting with the development of test procedures for new equipment or new functionality;
- Assisting with the design of cabling for new items of equipment;
- Adhering to all Safety and RADHAZ procedures of the SI&TF.

Formal Education/Certification/Clearance Requirements:

- A requirement for the position is to be an Australian Citizen and eligible to hold an Australian Defence security clearance i.e. NV1.
- Defence Security Clearance
- An A Grade Electricians License
- Completed a Diploma/Advanced Diploma Electronics Communications or equivalent training or trade level experience

Professional/Technical Experience Requirements:

- MIL SPEC Cable Termination experience
- Behavior's and Communication skills conducive to working in a multi-disciplinary collaborative environment
- A mature, collaborative and positive approach to your work
- An ability to work autonomously but also communicate effectively to the team
